```

400 Execute machine automation control module in server process in server machine

402 Initiate shutdown server object in server process of server machine

404 Initiate shutdown client object in client machine

406 Instruct shutdown server object to reboot client machine

408 Call reboot method in shutdown client object

410 Reboot client machine

412 Re-instantiate shutdown client object after reboot

414 Restore previous state to machine automation client objects

416 Optionally, wait for timer to expire

418 Return execution to machine automation control module
